

A Covenant on Demographic Change “Supporting innovation for age-friendly environments in Europe”

hosted by Committee of the Regions, Brussels

The Covenant on Demographic Change

As one of its core goals, the AFE-INNOVNET network was committed to frame and launch a Covenant on Demographic Change by the end of 2015. The overarching goal of the Covenant will be to engage local and regional authorities and other relevant stakeholders in developing environments supporting active and healthy ageing, thus improving healthy life expectancy, enhancing independent living of older persons and creating a society for all ages. The Covenant will aim at fostering synergies between relevant stakeholders in cooperation with existing initiatives such as the WHO Global Network on Age-Friendly Cities and Communities, the WHO-Europe Healthy City Network and the European Innovation Partnership on Active and Healthy Ageing.

Rue Belliard 99-101
1040 Brussels

About the Thematic Network AFE-INNOVNET

The Thematic Network on Innovation for Age-Friendly Environments is enshrined in the European Innovation Partnership on Active and Healthy Ageing, driven by the European Commission (DG CONNECT and SANTE) and supports the Action Group on Age-Friendly Environments. Indeed, to support the scaling up of existing and future innovative age-friendly environments across the EU, a large group of partners led by AGE Platform Europe have set up this thematic network to connect stakeholders (public authorities, older peoples organisations, service providers, industry, researchers) interested in the promotion of age-friendly environments at local, regional, national and EU level. This project is funded by the CIP ICT Policy Support Programme (Grant Agreement 620978).
